NOTES:

10-21-22

I am a Chronic Pain Patient with Severe damage to my back. I also have Intracranial Hypertension. I have had surgeries on my brain to try to help with the symptoms.

I have been to numerous Neurosurgeons for my back. I have a Compression fracture of the T12 Vertebral with Chronic Herniation. It has caused several of my other discs to bulge and or herniate. The Neurosurgeons have sent me to Dr. Margolin for Pain Management. Dr. Margolin has helped me tremendously with my pain by doing injections in my back and Medication.

It is very important to me and my health to continue to see him so that he can continue my treatments.

Please reconsider keeping Molina as a provider. Dr. Margolin has improved my quality of life by doing consistent treatments that are necessary for my health.

Molina must continue to cover services for Dr. Margolin.

Thank you,

P2

I am a patient of Dr. Margolin. I am getting a lot of help and function much better.

As a Molina member I am very concerned, shocked and dismayed about Molina refusing to cover Dr. Margolin's program.

I am scared (and there are a lot of other Molina patients like me) to go into withdrawal or get sick without pain medications if Molina drops coverage. It is extremely difficult to find another provider in this area. Molina even does not want to extend coverage to the enrollment period till the end of January to further hurt the members.

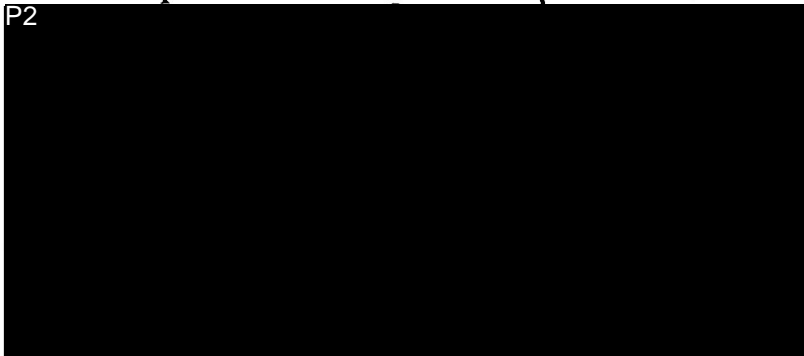

I thing is wrong and illegal. I will consider calling my congressmen and regulatory agencies.

Molina makes money while members suffer.

This is wrong!

Respectfully,

P2
